

# ADVICE™

Your complete online waste management tool.

ADVICE™ is a web-based software service that simplifies environmental, health, and safety (EH&S) compliance, enabling users to visualize their overall compliance standing at a glance.

## Key Features

- Collects inspection data directly through an iPhone application.
- Stores manifests, profiles, inspection data, waste inventory, and drug formulary electronically.
- Tracks regulatory deadlines.
- Reports EH&S analytics that allow you to determine risk and identify compliance initiatives.

## Module Breakdown

- **Compliance Calendar:** Tracks due dates for return manifests, SAA chemical disposal, and regulatory sampling.
- **Inventory Management:** Displays storage dates in relation to generator status and manages storage limits.
- **iPhone Inspections:** Automatically detects SAA, CAA, and other locations with barcodes. Uses pictures to capture and send compliance deficiencies for SAA, CAA, fire extinguisher, SPCC, and lab safety inspections.
- **Documents:** Prepares you for regulatory audits by allowing you to have all critical permits, training records, and reports stored in one location.
- **Manifests:** Uploads and stores signed manifests, packing slips, and land disposal restriction copies and tracks time limit on return manifests with a color-coding system.
- **Messaging:** Submits waste pickup and supply requests to Triumvirate's onsite support team.
- **Reporting:** Displays inspection, manifest, and waste profile data graphically as well as in a tabular layout.

*ADVICE collects, stores, and reports on EH&S compliance; you act on the data.*
