

# DEA Pharmaceutical Controlled Substances Services

*EH&S programs looking to the future.*

All our DEA Pharmaceutical Controlled Substances services are entirely customizable to best fit your organization's needs and goals.

*Here's what we can do for you:*

**Consulting:** We can consult from all angles. We'll look at your company goals and needs to help you decide if creating a drop-off location is the best option for your organization. If you decide setting up a drop-off location is right for you, we'll take care of the details down to the installation. Want a written management plan? We can do that too.

**Training:** We will train all employees on new procedures and processes and assure all staff members have the necessary knowledge to perform their jobs safely with a drop-off location.

**Management:** We will create and implement a DEA compliance plan to make sure your new drop-off location is optimally managed.
