

Lab Relocation

Combining a holistic approach and a streamlined, cost-efficient process.

Laboratory relocation is part of doing business in life sciences, biotech and pharmaceutical industries. Whether you are **expanding into a new space, renovating, moving operations, consolidating laboratories, or decommissioning a facility, laboratory cleanout and relocation can be complicated, costly and riddled with confusing liabilities and regulations.**

Triumvirate Environmental will **coach you through the project from beginning to end.** Our team of project managers, environmental risk assessors, lab service experts, engineers and decontamination specialists will **guide you through the process, identify risk, propose solutions and help you complete the project quickly and cost effectively.**

Our Turnkey Research Lab Relocation Service Package Includes:

- Project Management Support
- Environmental Risk Assessment
- Chemical Moves
- Chemical Disposal
- Research Lab Decontamination and Decommissioning
