

Complete  
**OSHA Compliance Reviews**

OSHA inspections are increasing, enforcement is up, injury rates are high and fines have been substantial. Over 4,000 workers died on the job in 2012.

To help you combat these potential problems, **Triumvirate offers a complete OSHA compliance review program that evaluates your current practices, reports your results to you and most importantly provides you with solutions.**

***Here's what comes with your consultation:***

- ✓ Review of the OSHA 300 logs for the past 3-5 years.
- ✓ We will conduct a site review to determine if any potential issues are present
- ✓ We will observe current work practices to ensure compliance
- ✓ Review of all the facilities required written safety programs
- ✓ Review of all safety training records

**We complete all OSHA compliance reviews in 2 to 3 business days.**

While other similar programs provide you with canned solutions and quick walk-throughs, **we promise to be as thorough as you want, focus on what you want and give you solutions based on what's important to you.**

All our compliance reviews are performed by OSHA experts with **5 or more years of workplace-safety dedicated experience.**

Our experts are authorized OSHA instructors and know firsthand what it's like to be audited. Our goal is to help **provide you with solutions** – not file reports.
