

# VACUUM TRUCK SERVICES

Triumvirate Environmental Inc. (TEI) provides transportation and disposal on a full range of waste streams, including hazardous and non-hazardous materials, and both large and small volumes of liquids, solids, and sludges. TEI uses a variety of vacuum and tanker trucks to transport your waste to disposal facilities in the most cost-effective and efficient way possible. TEI can handle your most challenging waste transportation and disposal projects.

## Truck Services and Capabilities

- Emergency response
- Transportation & disposal of hazardous & non-hazardous wastes
- Oil/water separator cleaning
- Confined space entry
- Neutralization tank cleaning
- Catch basin cleaning
- Line cleaning/jetting
- Excavation around critical utilities
- Tank cleaning & degassing
- Ejector pit cleaning
- Marine transfers
- Waste oil recycling
- Vacuum enhanced fluid recovery (VEFR)

## The Triumvirate Difference

- TEI maintains a wide variety of industry leading vacuum equipment permitted to transport both hazardous and non-hazardous materials.
- TEI can quickly profile almost any waste stream often while being dispatched to site.
- TEI equipment operators are trained in local, state, federal, DOT, RCRA, OSHA, and SPCC regulations, and are thoroughly versed in manifesting, placarding, and facility paperwork.
- Equipment operators will complete bulk waste disposal and transportation safely, quickly, and accurately, and provide job summary sheets for your reporting.
- TEI will evaluate your bulk waste generation activities and recommend specific transportation and disposal methods that best fit your organization's needs.
- TEI's remediation team can complete project design to execution to final regulatory report summary.
